At Voxx Sports, our roots are in sports. We’re committed to the spirit of competition at every level and we’re passionate about those who push the limits and unleash their maximum potential.

Our goal was to take the knowledge from over 45 years of research and findings and apply it in a practical and easy way. When the body’s nervous system operates effectively, the body is able to reach its performance potential. Our focus was on the athlete and the game. Make the science applicable and usable.

Enter Voxx Sports. With either the Upper **VoxxPower Guard** or Lower **VoxxStealth Guard**, you’ll increase strength, balance, stamina and range of motion. Voxx Powerguards and Stealth guards use our proprietary technology and a convenient “boil and bite” method to form perfectly to each person, instantly increasing your potential and protecting you from injury.

Shatter your limits with Voxx Sports performance mouthguards.

**FIND YOUR NEW EDGE**

We don’t make “mouthguards”. We make “performance mouthguards”. It’s a new kind of advantage. Both Upper and Lower Voxx Guards are engineered to get you to the next level of performance. With 45 years of science behind each guard, you optimize strength, stamina, balance and range of motion. Each Voxx Guard is self-fitting using a “boil and bite” method. And because it’s done at home, results are virtually instant. Voxx Guards let you train harder, play longer and shorten recovery time. VoxxPower Guards are the competitive advantage you’re looking for. Quick. Proven. It’s your new potential.

**VOXXPOWER GUARD**

**Benefits for Athletes**

**Improved Protection**
Voxx stabilizes the jaw and creates a safety space at the base of the skull that greatly reduces the risk of jaw impact and TMJ injuries. Voxx’s exclusive dual layer cushioned construction offers added protection from injury.

**Increased Strength with VOXXPOWER GUARD**
A critical factor in many sports and physical activities, increases in strength have an immediate impact on fitness, training and performance.

**Improved Balance with VOXXPOWER GUARD**
The ability to maintain position, remain centred and consistently perform a skill is often the by-product of one important attribute - balance.

**Improved Range of Motion & Flexibility with VOXXPOWER GUARD**
Gains in flexibility and range of motion benefit a wide range of physical activities and sports. Whether you are training, exercising or playing your favourite sport added mobility can make the all-important difference.

**Improved Training Endurance & Recovery**
Improved training and recovery will lead to overall better fitness and less injuries from any physical activity.

With the VoxxPower Guard, power meets protection. You get all the benefits to stretch your physical limits. You also get the peace of mind knowing that you’re protected from injury. The VoxxPower Guard is perfect for contact sports like football, boxing, MMA, hockey, basketball and rugby. Let your potential explode to the next level.

**VOXXSTEALTH GUARD**

With the Lower Stealthguard, overall performance will really take off. We’re talkin’ yoga, workouts, tennis, soccer, volleyball and just about any other non-impact activity. You get improved strength, endurance, balance, range of motion and increased breathing capacity. Voxx Stealth is ideal for non-contact sports, where speech and communication are crucial. Voxx Stealth is tailored to you.

HOW IT WORKS:

IT’S SCIENCE, NON-FICTION.

Many years of research, observation and trial and error, lead to the conclusion that human body responds most efficiently when the jaw and the 9 cranial nerves that pass around and through the area of the TMJ joint are decompressed and relaxed and at ‘rest’. The muscles of the neuro-muscular system function more efficiently from this this point of ‘rest’. When the TMJ and cranial nerves are not at ‘rest’, there is a physiologic weakening in one’s body, and explosive power in performance is diminished. Decompressing the TMJ and cranial nerves is the key to improving strength, speed, agility, balance as well as improve cognitive/visual reaction times, that is unique to every individual.

The VoxxGuard’s success lies in its ability to decompress and relax the TMJ and cranial nerves thus establishing unstrained and uninhibited neuro-pathways of the cranial nerves to the mid-brain region. The decompressed and relaxed nerves lead to a potentiation of the neuro-input to the mid-brain region and pons and the nuclei therein.

Imagine the neuro-pathways of the cranial nerves are a garden hose that has water (neuro-input) running through it. In normal instances tension and compression in the TMJ and cranial nerves leads to a constriction or impedance in the hose limiting the flow of water, it is as if someone is stepping on the hose. The VoxxGuard removes that constriction and impedance, seemingly lifting the foot off of the garden hose, allowing maximal water (neuro-input) to flow.

This potentiated neuro-input to the mid-brain, pons and reticular formation is critical as it is this region of the brain that controls exo-skeletal muscle response, respiration, heart rate, and vestibular system. This increased neuro-input leads to improved:

- Increased Strength
- Increased Power
- Improved Balance
- Improved Flexibility
- Improved Recovery and Endurance

VOXXPOWER: PERFORMANCE STUDY RESULTS

All Performance Testing was done by Sport Testing, the Leading Independent Authority on Athletic Performance Assessment. All Data on file.

VOXX: ENDORSEMENTS

“The first time I tried VOXX I was amazed that a mouthguard could have such a positive effect on my performance. VOXX is a proven product that’s has really helped to enhance my balance and my stability while cutting and shielding the ball. VOXX is a simple but very effective product.”
Dwayne De Rosario
MLS MVP 2011

“The VoxxPower Guard has improved my balance and strength on the ice. It is by far the most advanced and easy to use mouthguard I have ever used. I've bought the custom made $1000 mouth pieces and the Voxx works better and is easier to use. It truly does what they says it does”.
Matt Pelech
San Jose Sharks (NHL)

"For sceptics like me, I didn't believe a Voxx mouthpiece could improve performance until I tried it. Now I am trying to tell everyone I can about this amazing product. As a former high performance athlete I know that every edge counts but more importantly to me, Voxx has created it at an affordable price for everyone."
Jim Veltman
NLL Hall of Famer
NLL MVP
8 Time NLL Champion

“I have come to explore other means of improving athletic performance. As president of the Ontario Athletic Therapist Association I have to be very careful in what I endorse. I have come across the VOXX mouth guard and after testing it on myself through my golf game, and with a few of the Hurricanes, I can endorse this product without worry. These mouth guards can be used to improve off-ice training sessions as well as in competition. We plan on using them in non sporting situations within my clinic but I think coaches can suggest this guard for 3 reasons; Improved sports performance, ease of forming to the teeth and quality of fit and finally, cost effective.”
Drew Laskoski CAT(C)
President
Ontario Athletic Therapist Association
Head Athletic Therapist
Newmarket Hurricanes Jr ‘A’ Hockey Club

VOXXPOWER GUARD TECHNOLOGY: THE HOW AND WHY IT WORKS

Many years of research, observation and trial and error, lead to the conclusion that human body responds most efficiently when the jaw and the 9 cranial nerves that pass around and through the area of the TMJ joint are decompressed and relaxed and at ‘rest’. The muscles of the neuro-muscular system function more efficiently from this this point of ‘rest’. When the TMJ and cranial nerves are not at ‘rest’, there is a physiologic weakening in one’s body, and explosive power in performance is diminished. Decompressing the TMJ and cranial nerves is the key to improving strength, speed, agility, balance as well as improve cognitive/visual reaction times, that is unique to every individual.

The VoxxGuard's success lies in its ability to decompress and relax the TMJ and cranial nerves thus establishing unstrained and uninhibited neuro- pathways of the cranial nerves to the mid-brain region. The decompressed and relaxed nerves lead to a potentiation of the neuro-input to the mid-brain region and pons and the nuclei therein.

Imagine the neuro-pathways of the cranial nerves are a garden hose that has water (neuro-input) running through it. In normal instances tension and compression in the TMJ and cranial nerves leads to a constriction or impedance in the hose limiting the flow of water, it is as if someone is stepping on the hose. The VoxxGuard removes that constriction and impedance, seemingly lifting the foot off of the garden hose, allowing maximal water (neuro-input) to flow.

This potentiated neuro-input to the mid-brain, pons and reticular formation is critical as it is this region of the brain that controls exo-skeletal muscle response, respiration, heart rate, and vestibular system. This increased neuro-input leads to improved:

1. Strength improvement
2. Speed & Agility
3. Recovery Enhancement
4. Balance
5. Flexibility
6. Stability
7. Endurance
8. Cognitive Enhancements
References and Studies Investigating Physical and Athletic Improvement

Almost of 40 years of research that speaks to and validates that jaw position and cranial nerves play a direct role in strength, balance and flexibility.

VOXXPOWER GUARD EFFICACY RESULTS SUMMARY

BROAD JUMP IN INCHES

PULL UPS

VERTICAL JUMP IN INCHES

SIT AND REACH IN CM

AVERAGE WITHOUT VOXX

AVERAGE WITH VOXX
Sport Testing tested 34 subjects (Collegiate, Professional and Olympic Athletes)
The results showed marked performance improvements in Power, Strength, and Flexibility.
It appears that with the VoxxPower Guard inserted subjects are capable of achieving significant gains ranging over 5” increase on standing broad jump and over 40% in isometric strength. Additionally improvements of 23% were noted in flexibility and 7% in vertical jump
It would also appear that as the testing becomes more functional it provides greater results. (functional) – meaning more muscles being recruited in order to perform a task.

Sport Testing was not paid an honorarium or compensation for conducting the tests and findings.
Voxx Sports provided all athletes with VoxxPower guards.
